introduction

This annual cumulative index to **sociological abstracts** (**sa**), 2002, Volume 50, includes author, source, and subject indexes. All references to documents abstracted or cited in **sa** are by the accession number that precedes each abstract or book review. Accession numbers are structured as follows:

(1) five-digit accession number preceded by SA (eg, SA08020) refers to abstracts of journal articles or books; and

(2) six-digit accession number preceded by a (eg, a152266) refers to book review citations.

The *cumulative author index* is a name index: ie, author names are as they appeared in the source publications referenced.

The *cumulative source index* includes the full title, subtitle(s), and current subscription address of each publication screened for articles that satisfy **sa** selection criteria. References to articles abstracted from each publication, if any, are by year, volume, issue, sequence number, month/season, and pagination.

The *cumulative subject index* contains subject entries for documents cited in **sa**. Documents are indexed using the *Thesaurus of Sociological Indexing Terms*, comprising over 4,000 descriptor terms. These terms appear in boldface type in the subject index. Titles of relevant abstracts are listed by accession number.
